# SP Gearbox — Orders, Inbound Pipeline & Full-Year Forecast

Analysis of 2026 YTD sales (domestic + export), goods in transit and goods in manufacturing · Prepared July 30, 2026

| | | | |
|---|---|---|---|
| **9,326**<br>Units sold YTD 2026 (1,453 order lines, 117 customers) | **6,476**<br>Units on the water — inv. FS2606043L ($238,991 FOB) | **9,199**<br>Units in manufacturing — 7 open POs ($257,628 FOB) | **~$147k**<br>Est. reorder needed to cover next 12 months |

## Executive summary

**Demand is running at ≈1,332 units/month.** Sales YTD 2026 (Jan 1 – Jul 30, ~7 months) total 9,326 units across the SP/SM/S/SFM worm-gearbox family. Three sizes dominate: SP 50, SP 40 and SP 63 together account for 62% of all units sold.

**The inbound pipeline is healthy overall — 12,801 gearboxes (+2,815 spare parts) are inbound**, worth $496,620 FOB Shanghai: 6,076 gearboxes are on the water (invoice FS2606043L, 2×40GP, shipped from Shanghai, June 2026) and 6,784 are still in manufacturing at Hangzhou Fixedstar across 7 open purchase orders.

**But the mix is unbalanced.** At current run rates the pipeline covers 12–16 months of demand for sizes 50, 63 and 90, yet only ≈5–7 months for sizes 40, 75, 110 and 130. Size 75 (5.1 months) and size 40 (5.6 months) barely cover the rest of 2026, leaving nothing for early 2027 given a typical 3–4 month order-to-delivery lead time.

**Action: place a rebalancing order in Q3 2026** of roughly 2,000× SP 40, 660× SP 75, 280× SP 110, 230× SP 130, 420× SP 30 and 160× SP 63 (≈$147k FOB) to hold a 12-month horizon. Details in Section 4.

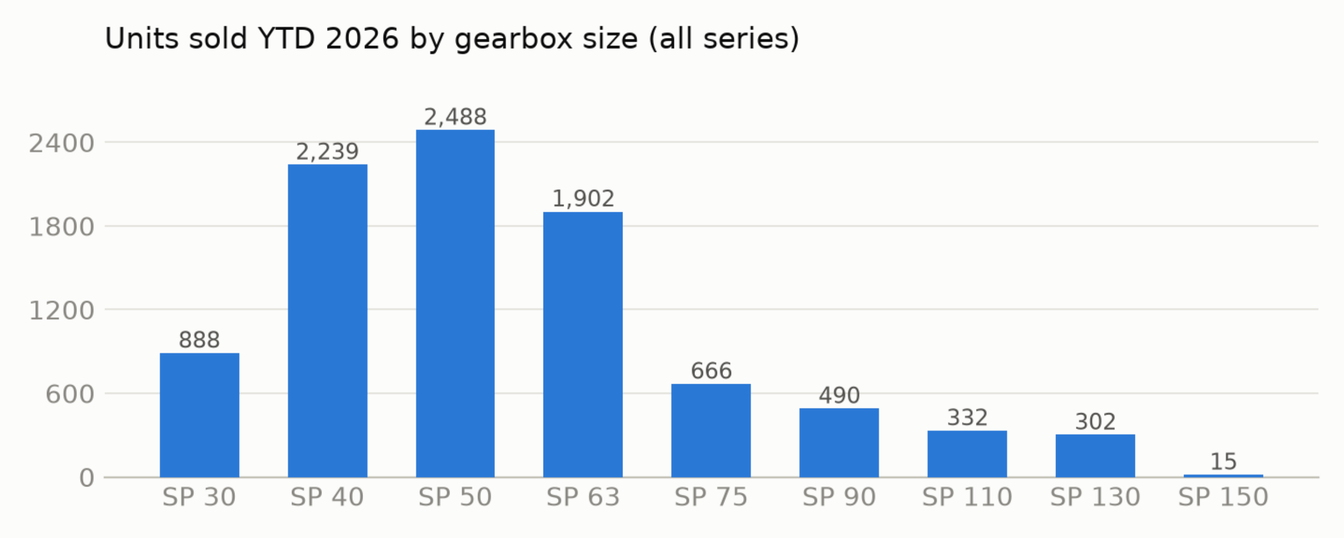
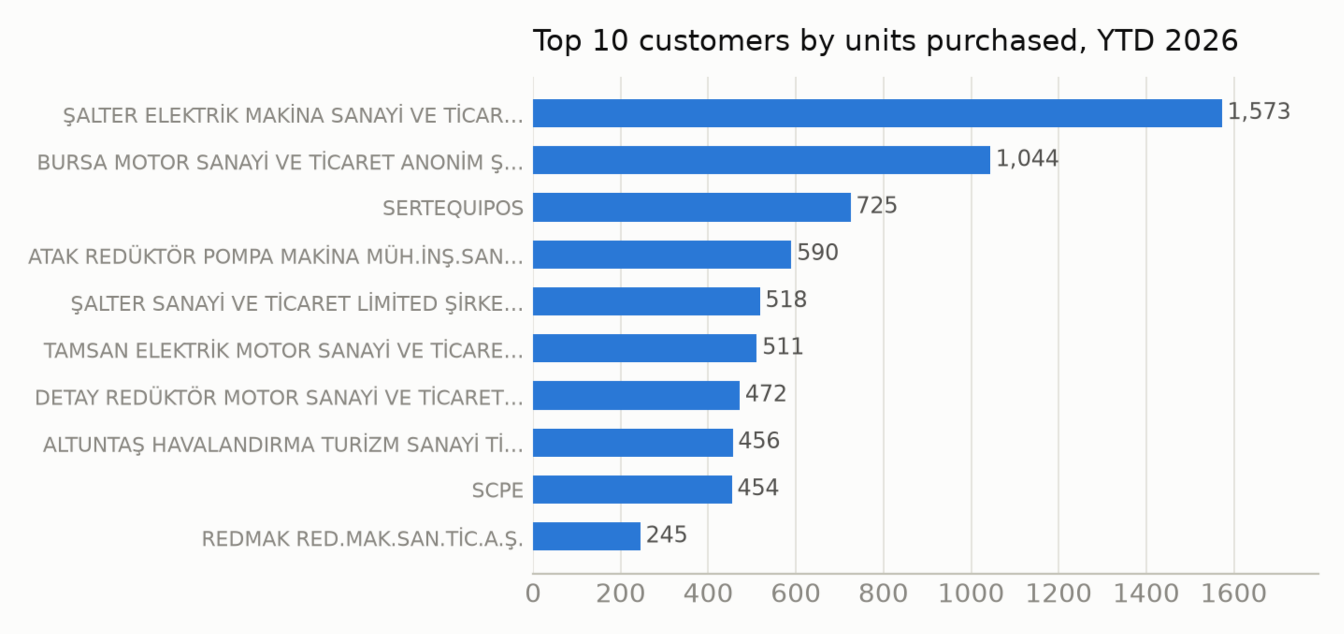
| SP ORDERS yd+yc.xlsx | All units bought & sold in 2026 YTD — 1,453 order lines (domestic + export). Used as the demand baseline. |
| FS2606043L (2×40GP) FINAL.xlsx | Commercial invoice dated Jun 09, 2026 — goods shipped and in transit: 6,076 gearboxes + 400 flanges, $238,991.25 FOB Shanghai. |
| ALL THE ACTIVE ORDERS.xlsx | Open orders at the factory (invoice draft dated Jun 17, 2026): 6,784 gearboxes + 2,415 spares across POs FCM251226 → FCM260701, $257,628.46 FOB. |

# 1 · Sales analysis — YTD 2026

9,326 units sold in 1,453 order lines to 117 customers (domestic + export). SP is the core series (8,144 units, 87%); SM (806), SFM (285) and S (235) make up the remainder. Four non-gearbox lines (anchor windlass & accessories) are excluded from size-level analysis.



| Size | Sold YTD (units) | Share | Avg / month | Top series split |
|---|---|---|---|---|
| SP 30 | 888 | 9.5% | 127 | SP 752 · S 75 · SM 61 |
| SP 40 | 2,239 | 24.0% | 320 | SP 1,830 · SFM 220 · SM 139 · S 50 |
| SP 50 | 2,488 | 26.7% | 355 | SP 2,212 · SM 216 · SFM 38 · S 22 |
| SP 63 | 1,902 | 20.4% | 272 | SP 1,741 · SM 127 · S 29 · SFM 5 |
| SP 75 | 666 | 7.1% | 95 | SP 533 · SM 63 · S 59 · SFM 11 |
| SP 90 | 490 | 5.3% | 70 | SP 442 · SM 37 · SFM 11 |
| SP 110 | 332 | 3.6% | 47 | SP 332 |
| SP 130 | 302 | 3.2% | 43 | SP 299 · SM 3 |
| SP 150 | 15 | 0.2% | 2 | SP 15 |
| **Total** | **9,322** | **100%** | **1,332** | |



Customer concentration: the top 10 customers take 6,588 units (71% of volume); the top 3 alone take 36%. ŞALTER Elektrik (1,573) and Bursa Motor (1,044) are the anchor accounts; SERTEQUIPOS (725) and SCPE (454) lead the export side.

## 2 · Inbound supply pipeline

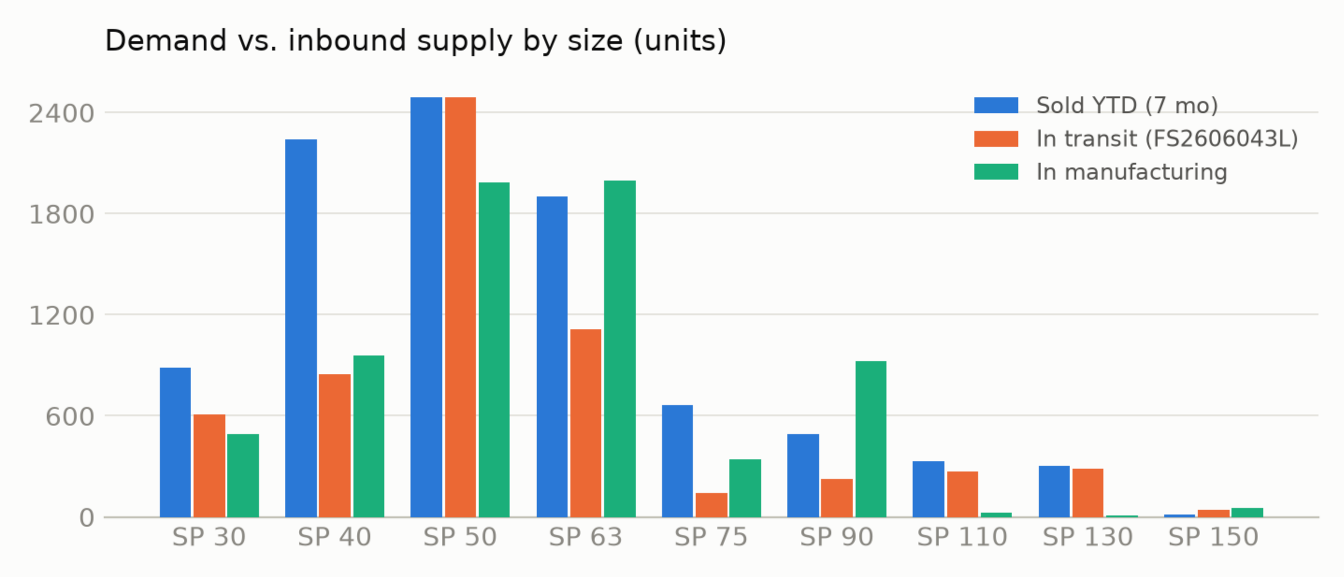
### 2.1 · On the water — invoice FS2606043L (2 × 40GP)

Shipped from Shanghai, invoice dated Jun 09, 2026. 6,076 gearboxes + 400 input flanges, $238,991.25 FOB. Packing list: 65,795 kg gross, 94.84 CBM, 124 pallets. Covers factory orders WX4417, WX4422, WX4437, WX4734, part of WX4847, WX5008 and WX5252. Typical Shanghai → Istanbul transit is 30–40 days, so arrival is expected late July / August 2026.

### 2.2 · Still in manufacturing — open POs at Hangzhou Fixedstar

Draft invoice dated Jun 17, 2026 lists 6,784 gearboxes + 2,415 spare parts (flanges, shafts, motor-adapters) across 7 purchase orders, $257,628.46 FOB. These will ship in subsequent containers (expected Q3–Q4 2026).

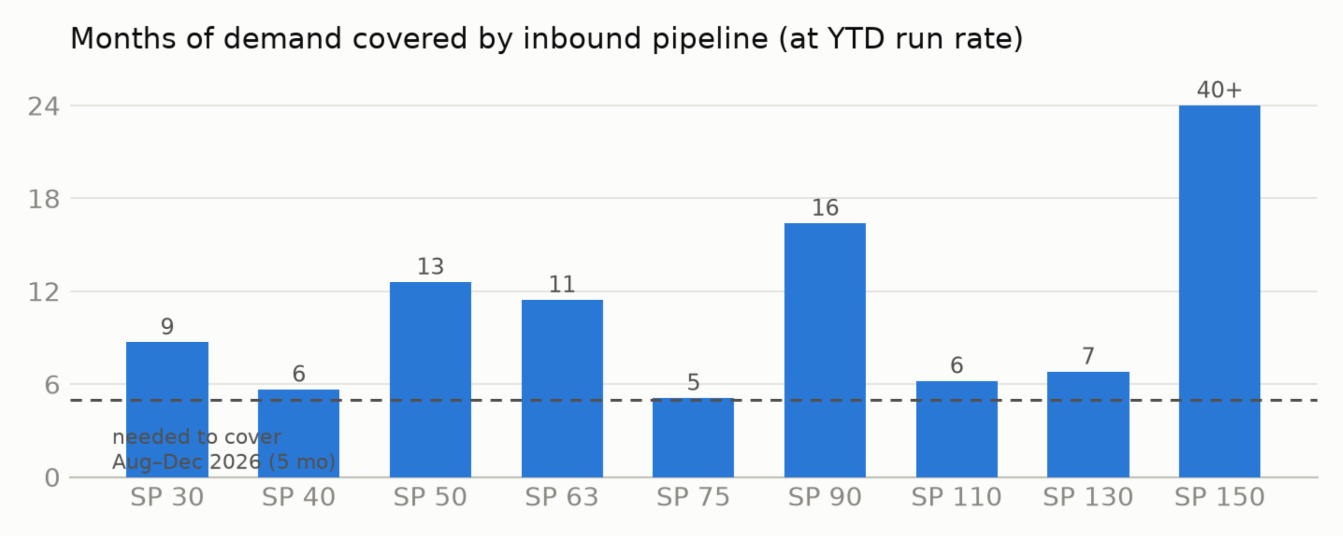
| PO | Factory ref | Value (USD FOB) | Note |
|---|---|---:|---|
| FCM251226 | WX4847 · WX4909 | $82,937.30 | Balance of Dec order incl. 500× SP 90 added Apr 14 |
| FCM260508 | WX5008 | $63,036.30 | May order — incl. 50× SP 150 i:40 |
| FCM260601 | WX5112 | $35,983.10 | June stock order + input flanges + 600 motor-adapter units |
| FCM260603 | WX5123 | $17,117.50 | June order + SP 63 output flanges |
| FCM260616 | WX5174 | $16,291.00 | Incl. 500× SP 50 i:100 |
| FCM260617 | WX5183 · WX5204 | $40,743.26 | Mixed small-lot order + 40× SP 110 special |
| FCM260701 | WX5252 part | $1,520.00 | Input flanges 40/50/63/75 (repeat) |
| **Total** | | **$257,628.46** | |



| Size | In transit (units) | In transit ($) | In mfg (units) | In mfg ($) | Total pipeline (units) |
|---|---|---|---|---|---|
| SP 30 | 610 | $9,245 | 493 | $7,346 | 1,103 |
| SP 40 | 849 | $14,740 | 958 | $16,594 | 1,807 |
| SP 50 | 2,489 | $64,779 | 1,985 | $51,693 | 4,474 |
| SP 63 | 1,112 | $39,561 | 1,994 | $71,021 | 3,106 |
| SP 75 | 143 | $7,436 | 342 | $17,784 | 485 |
| SP 90 | 224 | $15,904 | 923 | $65,533 | 1,147 |
| SP 110 | 271 | $31,165 | 23 | $2,645 | 294 |
| SP 130 | 286 | $43,186 | 7 | $1,057 | 293 |
| SP 150 | 42 | $10,710 | 50 | $12,750 | 92 |
| SP 25 | 50 | $745 | 9 | $134 | 59 |
| Spare parts | 400 | $1,520 | 2,415 | $11,071 | 2,815 |
| **Total** | **6,476** | **$238,991.25** | **9,199** | **$257,628.46** | **15,675** |

## 3 · Forecast & coverage

Method: YTD sales (7.0 months) set a monthly run rate per size; demand is assumed flat for the rest of 2026 and the next 12 months. Coverage = total inbound pipeline ÷ monthly run rate. Warehouse stock on hand is **not** included (not in the source files), so real coverage is at least what is shown here.



| Size | Run rate /mo | Pipeline (units) | Cover (months) | Forecast Aug–Dec | Forecast 12 mo | Gap next 12 mo | Gap value (FOB) |
|---|---|---|---|---|---|---|---|
| SP 30 | 127 | 1,103 | 8.7 | 634 | 1,522 | 419 | $6,247 |
| SP 40 | 320 | 1,807 | 5.6 | 1,599 | 3,838 | 2,031 | $35,141 |
| SP 50 | 355 | 4,474 | 12.6 | 1,777 | 4,265 | 0 | — |
| SP 63 | 272 | 3,106 | 11.4 | 1,359 | 3,261 | 155 | $5,487 |
| SP 75 | 95 | 485 | 5.1 | 476 | 1,142 | 657 | $34,149 |
| SP 90 | 70 | 1,147 | 16.4 | 350 | 840 | 0 | — |
| SP 110 | 47 | 294 | 6.2 | 237 | 569 | 275 | $31,641 |
| SP 130 | 43 | 293 | 6.8 | 216 | 518 | 225 | $33,932 |
| SP 150 | 2 | 92 | 42.9 | 11 | 26 | 0 | — |
| **Total** | **1,332** | **12,801** | **9.6** | **6,659** | **15,981** | **3,762** | **$146,598** |

### Reading the table

**Comfortable (≥ 11 months):** SP 50 (12.6), SP 63 (11.4), SP 90 (16.4), SP 150 (40+). The 500-piece SP 90 batch (WX4909) and the two 500-piece SP 50 i:100 batches drive this. No action needed until ~Q2 2027; SP 90 and SP 150 risk over-stock — pause further orders on these sizes.

**Adequate to year-end only (5–9 months):** SP 30 (8.7), SP 130 (6.8), SP 110 (6.2), SP 40 (5.6), SP 75 (5.1). These clear Aug–Dec 2026 but leave 2027 exposed. With a 3–4 month factory + sea lead time, an order placed in August–September 2026 lands just as these run out.

**Largest absolute gap:** SP 40 — selling 320/month but only 1,807 inbound; a 12-month horizon needs ~2,030 more pieces (~$35k). SP 75, 110 and 130 each need $32–34k of coverage; together with SP 30 and a small SP 63 top-up the total rebalancing order is ≈3,760 units ≈ $147k FOB.

## 4 · Recommendations

**1. Place a Q3 rebalancing PO (~$147k FOB).**

Suggested quantities for a 12-month horizon: 2,030× SP 40, 660× SP 75, 420× SP 30, 280× SP 110, 230× SP 130, 160× SP 63. Round to container-efficient lots and ratio mix per recent sales. Placing this by September 2026 (3–4 mo lead) protects Q1–Q2 2027.

**2. Pause SP 90 and SP 150 ordering.**

SP 90 has 16.4 months of cover (923 pcs still in production) and SP 150 has 40+ months (92 pcs vs. 2/mo sales). Divert that budget to the gap sizes.

**3. Chase the two open containers.**

FS2606043L (2×40GP) should arrive ±August — confirm ETA, customs docs and QC on arrival. Agree a firm ship date for the $257.6k of goods still at the factory; SP 75 and SP 40 coverage depends on it.

**4. Watch the top-3 customer concentration.**

ŞALTER, Bursa Motor and SERTEQUIPOS are 36% of volume. A forecast check-in with each (their H2 order plans) would materially de-risk this forecast.

**5. Add warehouse stock to the model.**

This report only sees sold + inbound. Adding the current warehouse count per size would turn the coverage table into a true stock-projection and sharpen the reorder quantities.

### Assumptions & data notes

- YTD period assumed Jan 1 – Jul 30, 2026 (7.0 months); the sales file carries no dates. If it covers a different period, run rates scale accordingly.
- Demand is assumed flat (no seasonality) — the sales file has no monthly breakdown to model seasonality from.
- Sizes are matched across files: supplier "FCNDK nn" = your "SP/SM/S/SFM nn". All series variants of a size are served by the same inbound size.
- Values are USD, FOB Shanghai (supplier invoice prices); freight, duty and your sales prices are not in the source files.
- Warehouse stock on hand is not included — coverage figures are therefore conservative (minimum).
- FCM260701 input flanges (400 pcs, $1,520) appear in both the shipped and active files — treated as shipped once and noted here to avoid double-count in spares.
- 59 pcs of size 25 are inbound with no recorded size-25 sales YTD; excluded from the coverage table.
- All invoice totals were re-computed line-by-line and tie exactly: $238,991.25 (shipped) and $257,628.46 (active).
